

Stroffolino Bridge (Route 136 over Norwalk River) Rehabilitation

State Project No. 0173-0462

The Stroffolino Bridge Rehabilitation Project started on April 1, 2019, and is anticipated to be complete by mid-November 2019. The contractor is working days and nights to perform repairs and upgrades. Minimal weekend work is anticipated. Lane closures are necessary to facilitate work during off-peak traffic hours. The work being conducted as part of this project includes:

- Concrete, steel and electrical repairs
- Mechanical and electrical upgrades
- New wearing surface
- Repairs to the fender system in the navigable waterway

The Stroffolino Rehabilitation Project is performing major mechanical upgrades after October 1, 2019, which requires a bridge closure. The closure will happen during nighttime hours, Monday night through Wednesday night from 10:00 PM – 6:00 AM for a few weeks. The bridge will remain open during daytime hours.

This project is not part of the Walk Bridge Program. For more information on the Stroffolino Bridge Rehabilitation, please contact Tom Winter, CTDOT Project Engineer, at (203)785-8082 ext.113.
